

## Activity 7

Theory

Start to plan your RC car program. First, read the descriptions below.

Match the descriptions with the programming blocks.

| Description                                        | Programming blocks                                                                   |
|----------------------------------------------------|--------------------------------------------------------------------------------------|
| Set the pins for servomotors.                      |    |
| Set the pin for remote control and the IR sensor.  |    |
| Receive input using the IR sensor.                 |  |
| Respond to user-initiated events to move forwards, |  |
| Respond to user-initiated events to move left,     |  |
