

**SUBTRACT****Example 3**

- 1**  $2(x + 3) - (3x + 1)$
- 2**  $4(x + 1) - (5x + 2)$
- 3**  $5(x - 4) - (2x - 6) =$
- 4**  $6(x + 3) - (2x + 2) =$
- 5**  $7(x + 1) - (6x + 8) =$
- 6**  $8(x - 4) - (3x - 10) =$

**Outcomes**

- To add linear expressions.
- To solve real world problems involving subtracting expressions
