

Warm up

Subtract. Use models if needed.

1. $(6x + 2) - (9x + 3) =$

2. $(-4x + 7) - (-7x - 8) =$

3. $(6x - 7) - (2x + 5) =$

4. $(6x - 8) - (4x \boxtimes 7) =$

Outcomes

- To add linear expressions.
- To solve real world problems involving subtracting expressions
