

2

A, B, C and D are the vertices of a quadrilateral.

Describe the positions of the vertices using coordinates.

(a) Point A is units from the x -axis.

Point A is units from the y -axis.

Point A is at (,).

(b) Point B is units from the x -axis.

Point B is units from the y -axis.

Point B is at (,).

(c) Point C is units from the x -axis.

Point C is units from the y -axis.

Point C is at (,).

(d) Point D is units from the x -axis.

Point D is units from the y -axis.

Point D is at (,).
