

**7 Pragmatic understanding** Listen to the extracts from the lecture and answer the following questions.

1. Why does the professor comment when he sees the students smiling?
  - A He assumes that the students know the answer.
  - B He believes that the students' assumptions are wrong.
  - C He thinks that the students understand his humor.
  - D He realizes that the students are confused.
2. Why does the professor congratulate some of the students?
  - A because their assumptions were correct
  - B because they recalled what they learned in Psychology 101
  - C because they accurately remembered events in the crime simulation
  - D because they used their power of observation and memory
3. Why does the professor mention the crime simulation?
  - A to point out that people do not always remember events accurately
  - B to illustrate that people's power of observation affects their memory
  - C to emphasize the importance of the psychology course
  - D to give an example of how people's perceptions of an event may differ
4. What is the professor implying when he says, "And the emphasis here is on exhibit"?
  - A that most parents willingly show that they have preferences
  - B that the majority of parents do not exhibit their preferences
  - C that more parents have preferences but do not show them
  - D that the statistics about parents are important
5. Why does the professor ask the students to wait?
  - A He does not want the students to answer the question.
  - B He wants to prevent the students from changing their mind.
  - C He wants to encourage the students to change their mind.
  - D He would like to take a break for a moment.
