

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Class: \_\_\_\_\_

## Microorganism and Fungi

A. Choose the correct answer.

1. Microorganisms are \_\_\_\_\_.

- a) Living thing and non-living thing
- b) Non-living things
- c) Very tiny living things
- d) Giant living things

☐

2. Microorganisms can only be seen with \_\_\_\_\_.

- a) microphone
- b) telephone
- c) microscope
- d) stethoscope

☐

3. Microorganism is a living thing because it can \_\_\_\_\_.

- a) feed and think
- b) grow and sleep
- c) talk and move
- d) grow, breathe and move

☐

4. Amoeba, Daphnia and Paramecium are examples of \_\_\_\_\_.

- a) microorganisms
- b) insects
- c) moulds
- d) plants

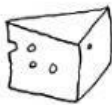

☐

5. Athlete foot is caused by \_\_\_\_\_ feeding on dead skin.

- a) larva
- b) fungi
- c) nymph
- d) worm

☐

6. Which of the following food is made by using Yeast?

- a) Cheese
- b) Chocolate
- c) Yoghurt
- d) Bread

☐

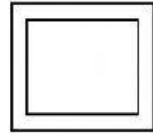

7. What will happen if we eat rotten food?

- a) Becomes healthier
- b) Fever
- c) Active
- d) Food poisoning

☐

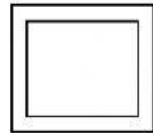

8. A bottle of milk is left on the table for two days will get sour. Why does this happen?

- a) Viruses destroy the milk
- b) The action of bacteria
- c) Carbon dioxide in the air dissolved into the milk
- d) The milk curdled

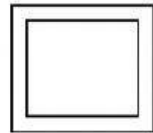

9. All of the following are harmful effects of microorganisms except \_\_\_\_\_

- a) Making Kimchi
- b) Covid19
- c) Flu
- d) Common cold

10. Plants are different from Fungi because \_\_\_\_\_

- a) they are fixed in one position.
- b) they can make their own food.
- c) they grow very fast.
- d) they move from one place to another.

B. Choose True or False.

|                                                                  |      |       |
|------------------------------------------------------------------|------|-------|
| • Yeast helps to turn milk into cheese.                          | True | False |
| • Bacteria help to digest food in the gullet and intestines.     | True | False |
| • Penicillium Fungus is used to make medicine called Penicillin. | True | False |
| • Bread mould is an example of bacteria                          | True | False |
| • Puffball reproduce from microscopic spores.                    | True | False |
