

# Calculating Earnings: Piecework

- Piecework Earnings = **Piece Rate** x **# of Pieces**
- **Piece Rate** = Piecework Earnings ÷ **# of Pieces**
- **# of Pieces** = Piecework Earnings ÷ **Piece Rate**

|  = \$ |              |            |            |
|--|--------------|------------|------------|
| Calculate the missing value:   |              |            |            |
| Name   | Daily Pieces | Piece Rate | Daily Wage |
| Sara   | 35           | \$1.75     |            |
| Joe  | 38           |            | \$57.00    |
| Jane   |              | \$5.25     | \$183.75   |
| Jack   | 40           | \$2.45     |            |
| Alex   | 44           |            | \$255.20   |
| Karen  |              | \$4.85     | \$295.85   |

**Gross Pay = base pay + piecework pay**

|          |              |  What is the missing value? |               |           |
|----------|--------------|--|---------------|-----------|
| Base Pay | Daily Pieces | Piece Rate   | Piecework Pay | Gross Pay |
| \$25.00  | 40           | \$1.75   |               |           |
| \$15.00  | 100          | \$0.50   |               |           |
|          | 5            |  | \$1525.00     | \$1625.00 |
| \$20.00  |              | \$5.00   | \$500.00      |           |
| \$50.00  | 150          | \$0.25   |               |           |
| \$30.00  | 25           |  | \$62.50       |           |
