

UTRJEVANJE OBSEGA, PLOŠČINE IN PLOŠČINSKE MERSKE ENOTE

1. Izračunaj neznane količine.

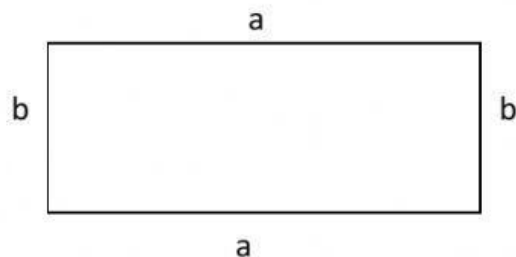

a.) PRAVOKOTNIK

$$a = 7 \text{ m}$$

$$b = 12 \text{ m}$$

$$o = \underline{\hspace{2cm}} \text{ m}$$

$$p = \underline{\hspace{2cm}} \text{ m}^2$$

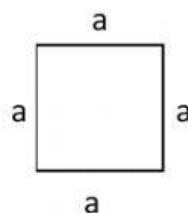

b.) KVADRAT

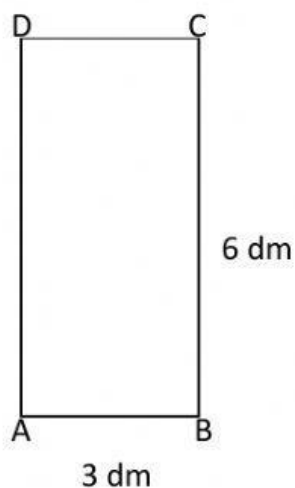

$$a = 4 \text{ cm}$$

$$o = \underline{\hspace{2cm}} \text{ cm}$$

$$p = \underline{\hspace{2cm}} \text{ cm}^2$$

2. Izpiši podatke. Izračunaj obseg in ploščino pravokotnika.

$$a = \underline{\hspace{2cm}} \text{ dm}$$

$$b = \underline{\hspace{2cm}} \text{ dm}$$

$$o = \underline{\hspace{2cm}} \text{ dm}$$

$$p = \underline{\hspace{2cm}} \text{ dm}^2$$

3. Koliko meri stranica kvadrata s ploščino 16 cm^2 ?

KVADRAT

$$p = 16 \text{ cm}^2$$

$$a = \underline{\hspace{1cm}} \text{ cm}$$

4. PRETVORI:

$$340 \text{ dm}^2 = \underline{\hspace{1cm}} \text{ m}^2 \underline{\hspace{1cm}} \text{ dm}^2$$

$$200 \text{ dm}^2 = \underline{\hspace{1cm}} \text{ m}^2$$

$$5 \text{ m}^2 = \underline{\hspace{1cm}} \text{ cm}^2$$

$$3 \text{ dm}^2 = \underline{\hspace{1cm}} \text{ cm}^2$$

$$130 \text{ cm}^2 = \underline{\hspace{1cm}} \text{ dm}^2 \underline{\hspace{1cm}} \text{ cm}^2$$

$$450 \text{ dm}^2 = \underline{\hspace{1cm}} \text{ m}^2 \underline{\hspace{1cm}} \text{ dm}^2$$
