

Watch the video.

Fill in the blanks with the words from the box.

Lines go on in both directions.

When we have two lines, this is called .

Sometimes, a pair of lines will or cross at a point. We call these lines. Intersecting lines form an angle.

When intersecting lines meet at (90°), they are called lines.

Some lines never meet. They always stay an equal distance apart. They are called lines.

Copy the text in your notebook. Memorise it.

intersect

a pair of lines

forever

perpendicular

intersecting

a right angle

parallel

Classify whether pairs of lines are parallel, perpendicular and intersecting.
