MATHEMATICS: DIVISION PARTS

By Miss Lennon 😊

REMEMBER:

DIVIDEND IS THE AMOUNT OR ITEM BEING SHARED

DIVISOR IS HOW MUCH YOU WILL SHARE THE AMOUNT OR ITEM

QUOTIENT IS THE ANSWER. IT IS HOW MUCH EACH WILL GET.

What is the dividend, divisor and quotient in each problem?

1. Jeremy has 18 slices of pizza. He shares it with his 3 friends. Each person got 6 slices.

Dividend

Divisor

Quotient

2. At a party, gummy bears were given out to 25 children. Each child got 5 gummy bears. There were 125 gummy bears in total.

Dividend

Divisor

Quotient

3. The charity handed out 2 toys to each person. There were 100 toys. Fifty people got toys.

Dividend

Divisor

Quotient

4. A bottle has 1000 ml of water. Janice drank 10 mouthfuls. She drank 100ml every mouthful.

Dividend

Divisor

Quotient

5. There are 7 days in a week. In a month there are 28 days. There are 4 weeks in a month.

Dividend

Divisor

Quotient

6. 4 apples are placed into each basket. There are 40 apples in all and 10 baskets.

Dividend

Divisor

Quotient
