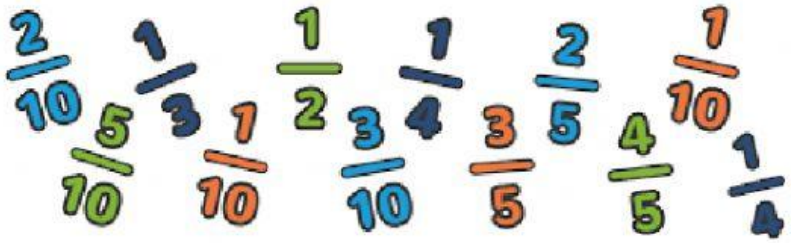
WHAT ARE FRACTIONS?



1.- Join with arrows:

SHAPE	FRACTION	HOW DO YOU READ...?
	$\frac{3}{9}$	Four fifths
	$\frac{5}{8}$	Four sevenths
	$\frac{4}{5}$	One half
	$\frac{12}{20}$	Two thirds
	$\frac{9}{12}$	Three eignths
	$\frac{2}{3}$	Three ninths
	$\frac{3}{8}$	Twelve over twenty
	$\frac{4}{7}$	Five eigths
	$\frac{6}{10}$	Six tenths
	$\frac{1}{2}$	Nine over twelve

2.- Daniel has 3 strawberry candies, 5 lemmon candies and 7 orange candies.

- What fractions of candies are strawberry? $\frac{7}{15}$
- What fractions of candies are lemmon? $\frac{3}{15}$
- What fractions of candies are orange? $\frac{5}{15}$

3.- Cristopher has eaten pizza for dinner. He eats three eighths of the pizza. What fraction of pizza is left?

Fraction of pizza is left → ——

4.- Calculate:

a) $\frac{2}{3}$ of 24 = (·) : =

b) $\frac{4}{5}$ of 45 = (·) : =

c) $\frac{1}{6}$ of 120 = (·) : =

d) $\frac{4}{10}$ of 210 = (·) : =

5.- Jadiel has 120€ and he spends three quarters of his money to buy a book.

- How much money does he spend? → —— of = €
- What fraction of his money is left? → ——
- How much money has he left? → €

6.- Drag the correct result:

a) 1.5 =

b) $\frac{4}{10} =$

c) 1.32 =

d) $\frac{3}{5} =$

e) 0.13=

f) $\frac{5}{6} =$

g) 4.25 =

h) $\frac{7}{4} =$

i) 0.013 =

$\frac{13}{1000}$ 0.4 $\frac{132}{100}$

0.6

0.833

$\frac{425}{100}$ $\frac{15}{10}$

1.75 $\frac{13}{100}$
