Animation, Fantasy. "Tim Burton's Corpse Bride" is not the macabre horror story the title suggests, but a sweet and visually lovely tale of love lost. In an era when most animated films look relentlessly bright and colorful, "Corpse Bride" creates two palettes, and not the ones we expect.

The world of the living is a drab and overcast place with much of the color drained from it, and the remaining grays and purples and greens so muted they seem apologetic. The world of the dead, on the other hand, is where you'd want to spent your vacation. It's livelier, cheerier and with brighter colors. Also, as the hero discovers when he visits there, it *is* true that when your pets die, they go to the same place you go: Victor Van Dort is greeted ecstatically by Scraps, the dog he had as a child. Scraps, to be sure, is all bones, but look at it this way: No more fleas. Or maybe skeletal fleas. I'm not sure about all the fine points. It was written by Caroline Thompson.
