

English Quiz

Name: _____

Semester: _____

Read the instructions carefully and do what is asked.

 Listen to a man and a woman talking about their reading habits. Check (✓) True or False for each sentence.

	True	False
1. The woman doesn't see the point of reading short stories.	☐	☐
2. The woman thinks online games are fun.	☐	☐
3. The man mainly reads books that have been assigned in class.	☐	☐
4. The woman is struggling with her course work.	☐	☐
5. The woman will probably read the short stories the man recommends.	☐	☐

Complete the conversation with the words from the box. Some words are used more than once.

also	and	both	either	neither	nor	not only	or
------	-----	------	--------	---------	-----	----------	----

- A It's interesting, isn't it, how cell phones have changed so much in just a few years. I mean, not so long ago they were ⁽¹⁾ really expensive, but ⁽²⁾ really big and bulky.
- B I know what you mean. My dad had this huge thing. He was always complaining about it. He said they were ⁽³⁾ affordable ⁽⁴⁾ convenient.
- A Yeah. I mean, half the time you couldn't even make a call because you were out of range.
- B I know. You ⁽⁵⁾ had to find a payphone ⁽⁶⁾ just wait until you got home and then make a call.
- A Wow. Can you imagine having to do that today?
- B No way. People have ⁽⁷⁾ the time ⁽⁸⁾ the patience to do that.
- A Right. Everyone needs to be in constant contact. I mean, everyone I know has ⁽⁹⁾ a smartphone ⁽¹⁰⁾ a tablet. You know, so they're never out of touch.

English Quiz

Replace the words in *italics* with the type of phrase given in parentheses.

1. People *who commute to work* _____ on public transportation spend a lot of time on their computers. (present participle)

TOTALLY GOT
THIS!

English Quiz

Read the text and choose the correct option: True or False.

www.technology.com/classrooms

Technology in U.S. Classrooms

Technology is changing all our lives at an increasingly rapid rate, and this is happening not only in homes and offices, but also in schools. Technology in school will potentially revolutionize both the way students learn and the methods used by teachers. A study on how widely technology is used in U.S. schools has produced some interesting findings.

Sixty-three percent of all teachers reported that students in their schools had access to high-speed Internet in the classroom. When this data was broken down according to the grades the teachers taught, 49 percent in high school grades had high-speed Internet access in their classrooms, compared with 55 percent in middle school grades and 72 percent in elementary grades. It is worth noting that there were no significant differences in classroom Internet access associated with the places where schools were located: Typically, rural, suburban, and urban schools offer similar levels of Internet access. Nor, apparently, were there any major differences across the range of subjects taught.

Another issue highlighted by the study is how wide the variation is in teacher technology competency between states. Only 27 states (52 percent) have minimum technology competency standards, and only 11 (21 percent) provide data on how well teachers meet these standards. The methods used to evaluate teacher competency in this area also vary greatly. The states that reported the percentage of teachers meeting minimum standards of technology competency gave figures that varied from 8 to 100 percent. There is clearly more work to be done.

1. The older the students, the more likely they are to have Internet access in the classroom. _____
2. In general, students in rural schools have less access to the Internet than students in urban schools. _____
3. It is more appropriate to teach some subjects than others by using the Internet. _____
4. Most states do not keep data on how well teachers meet technology competency standards. _____
