7. Let's watch this movie with Vin Diesel, it's called Fast and Furious.
8. He is my best friend, _____ he is late all the time. He never comes on time.

SUMMARY OF THE FRANKENSTEIN STORY

The story starts during Captain Walton's voyage to explore the North Pole, when his crew stumbles upon an enormous human-like monster and later rescues a frozen Victor Frankenstein. Victor Frankenstein tells his story to Captain Walton. Frankenstein was born in Naples, Italy, and grew up in Geneva. He has two brothers and an adopted sister, Elizabeth Lavenza, his love interest and, later on in the story, his fiancée. Young Victor was interested in chemistry. He studied on the University of Ingolstadt in Germany and excelled in his studies.

He developed a process for making non-living beings come alive. He often visited graveyards and collected many human body parts that he puts together. In a scientific experiment, Victor manages to create a hideous humanoid, even though his original plan was to make a beautiful one. The monster comes alive, opens its eyes and makes a horrible sound. Victor is very scared and runs away, leaving the creature alone in the laboratory. Later, Victor's creature runs away and Victor becomes ill. The monster lives alone in the forests and slowly learns

to speak and read, after listening to people secretly. However, it is very sad and depressed because everyone hates him and he cannot find any friends. Two years later, Victor's little brother, William, is murdered and Victor knew it was his creation that killed his brother. Victor doesn't tell anyone of his monster because he thinks nobody will believe him.

Later, the creature goes back to Victor to ask for a female creation, because people are scared of him and he cannot find friends. The creature threatens to kill Victor's family and friends if he does not do it. So Victor tries to create a female counterpart while he becomes afraid of what could happen next. When Victor destroys the female creation, the creature becomes furious and kills Henry, Victor's friend, and also threatens to kill Victor's fiancée on his wedding night.

Victor and Elizabeth were about to marry when the creature strangles Elizabeth to death. Victor tries to kill the creature and chases him down. That's how he ended up in the North Pole, almost frozen to death, before Captain Walton and the crew found him. After Victor Frankenstein tells his story, he dies. The creature mourns over the death of his creator and promises to kill himself.

CONNECT THE CHARACTERS WITH THEIR DEFINITIONS

- | | |
|-------------------------|---|
| 1. ELIZABETH LAVENZA | a. He is a scientist and created the monster. |
| 2. CAPTAIN WALTON | b. He is the creature that Victor created. People are scared of him. |
| 3. VICTOR FRANKENSTEIN | c. He is an explorer who saves Victor from freezing to death on the North Pole. |
| 4. WILLIAM FRANKENSTEIN | d. She is an adopted sister and fiancée of Victor's. They fall in love. |
| 5. HENRY CLERVAL | e. He is Victor's little brother, who was murdered by the monster. |
| 6. THE MONSTER | f. He is one of Victor's best friends, who gets killed by the monster. |
