# Creating Equivalent Fractions

**To create an equivalent fraction:**

You can *multiply (x)* OR *divide* (÷)

both the *numerator*(top number) ***and*** *the* *denominator* "down below" number)

by the ***same number.***

| | |
|---|---|
| $\frac{4}{8}$ x 2 = ___ <br> x 2 = | $\frac{4}{8}$ ÷ 2 = ___ <br> ÷ 2 = |
| $\frac{1}{2}$ x 2 = ___ <br> x 2 = | $\frac{2}{4}$ ÷ 2 = ___ <br> ÷ 2 = |
| $\frac{1}{3}$ x 3 = ___ <br> x 3 = | $\frac{3}{9}$ ÷ 3 = ___ <br> ÷ 3 = |
| $\frac{2}{10}$ x 2 = ___ <br> x 2 = | $\frac{2}{10}$ ÷ 2 = ___ <br> ÷ 2 = |

Using the method above, are these 2 fractions equal? (=)

YES NO

$\frac{1}{3}$

$\frac{3}{8}$
