

## Let's look closer!

Read the letter below and match the headings from the right part to the paragraph numbers, then underline the phrases that connect details or facts to the situation.

Dear Sir/Madam,

1/ I am writing to complain about the amount of pollution and damage people are causing earth. which in turn leads to global warming and other destructions.

As a result of burning fossil fuels, more gases are released into the air. This problem is particularly worrying, knowing that thousands of forests are being cut down.

2/ It's very important to consider that global warming increases the average temperature of the earth's atmosphere because it increases the heat coming from the sun and the earth itself. As a result, It is continuously warmed by man-made gases such as burning fossil fuels from factories and fuels from vehicles. That is why cutting down forests leads to having fewer trees that help intake these harmful gases out of the air.

3/ For these reasons, it is important for people to take action now on global warming. I believe it's important to do everything possible to reduce man-made pollution.

Thank you for your kind attention.

Best regards

Mona Adel
