

# Looking after our planet

## True or False?

If something disappears from an ecosystem, all the other living things in that ecosystem are affected.

The variety of plants and animal life in a particular habitat is called biodiversity.

The global human population is not growing.

Today we use more water, energy and resources than ever before.

Pollution benefits our planet and stops global warming.

Forests are cut down to make areas for crops.

Replacing natural forests with plantations, benefits the biodiversity of the area.

Biosphere reserves are not important to maintain biodiversity
