

Complete the text:

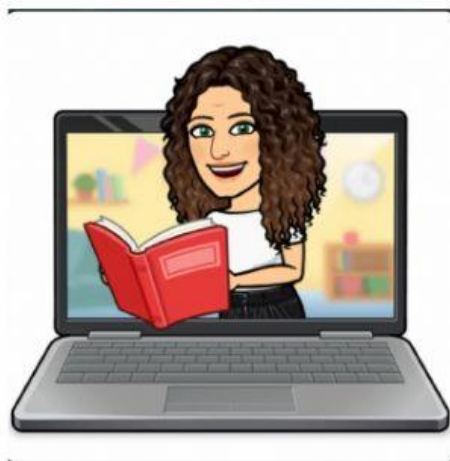

A river is a large, moving _____ of _____
water. They start at a _____ on high land and flow downhill
following a _____.

A river can flow into:

- a) a _____
- b) another _____
- c) the _____ or ocean

A river has three different parts :

- 1. _____
- 2. _____
- 3. _____

Now let's concentrate on the different parts of a river. Mark with an X to the corresponding column:

	UPPER COURSE	MIDDLE COURSE	LOWER COURSE
The valley is wider with gentle slopes			
The river flows across a plain			
It's near the river's source			
There are small bends			
The river is wider			
There is sometimes a estuary			
The river starts to deposit stones and soil on the river bed.			
The river flows through a V shaped valley			
There are many lage bends.			
The river is very wide			
The river carries stones and soil			
It is where the mouth of the river is located			
The river flows more slowly			
The river is narrow and flows fast			
There is sometimes a delta.			
The water moves very slowly.			
The river bed is rocky			

Write the missing word.

- a) The river divides into various narrow channels at its mouth → _____
- b) There is one big wide channel at the river's mouth → _____
- c) A river that flows into another river → _____
- d) The sea, ocean or lake where some rivers flow into → _____
- e) Area of land where all the precipitation that falls drains into the river → _____
- f) In Spain there are three watersheds → _____ ,
_____ and _____

GOOD LUCK FOR THE EXAM.
YOU CAN DO IT VERY WELL!!!
