

Fill in the missing digits and complete the following items using steps in long division. **R = 0** in each case.

[illegible]

Diagram illustrating a long division problem:

Divisor: 25

Dividend: 9265

Quotient:

Remainder: R

The diagram shows the steps of the division process, including the placement of the divisor, the dividend, and the quotient, with arrows indicating the flow of the calculation.

				R
3. 6	7	7	8	2

Worksheet 1

Count and Tally

Draw tally marks for each object. How many of each object are there?

1. 		
2. 		
3. 		
4. 		
5. 		
6. 		

Match the numbers on the right to the correct spaces to complete each number sentence on the left.

1. $8 \times \underline{\quad} = 32$

10

2. $\underline{\quad} \times 2 = 24$

8

3. $6 \times \underline{\quad} = 36$

4

4. $\underline{\quad} \times 9 = 45$

0

5. $7 \times \underline{\quad} = 49$

12

6. $\underline{\quad} \times 10 = 100$

6

7. $457 \times \underline{\quad} = 0$

5

8. $7 \times \underline{\quad} = 56$
