PRACTICE 4

Questions 16 - 25

Read the article below and use the information given to complete the following task.

Taman Negara

Taman Negara (National Park) is situated on the borders of Kelantan, Terengganu and Pahang in Peninsular Malaysia. A totally protected area of 4 343 sq km, Taman Negara is one of the world's oldest tropical rain forests. The diversity of its fauna and flora is a result of undisturbed evolution over 130 million years.

Taman Negara is a particularly favourable destination for trekking, as the park's remarkable biodiversity is matched by a good network of jungle trails and the availability of expert guides. The park is also noted for fishing, especially along the upper reaches of the Tahan or Kenyam rivers, and for rafting the rapids of Sungai Tembeling.

Peninsular Malaysia's highest mountain, Gunung Tahan (2 187 meters), is located in Taman Negara, and climbing the mountain is an unforgettable experience. Due to the scarcity of water along the route, the journey must be done in two stages, and an experienced guide is compulsory. At least three days are required for the journey to the summit and back.

On the southern edge is Kuala Tahan, the park's headquarters, linked to the outside world by river. A three-hour river trip is the only overland route; an alternative is to take a flight from Kuala Lumpur to Taman Negara.

Questions 16 - 25

Based on the given descriptions on Taman Negara, complete the mind map below.
