

Name: _____ Mathematics

Year 4 (Week 11)

Topic: Bar Graph

A graph to show which sport children voted as their favourite

- 74 children like football and which other sport?
- What is the difference between the total of children who prefer athletics and swimming and the number of children who prefer football?
- What is the difference between the total of the two most popular sports and the total of the two least popular sports?
- The least popular sport has 33 fewer votes than which sport?

Challenge

How many children like sports played without a ball? What is the total number of children who voted?
