Digestive System

Complete the following text:

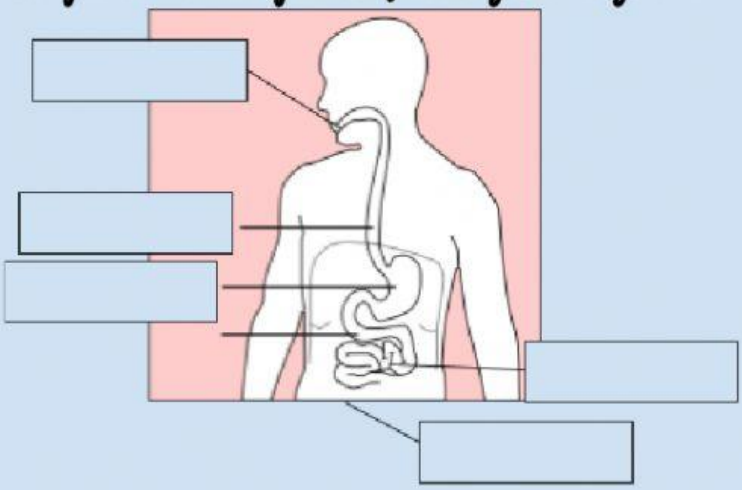

Our digestive system breaks _____ down into small particles called _____ Our muscles and organs need them to give us _____ and help us grow. Once the digestive system has extracted the nutrients, it gets rid of the _____

Match the columns:

Mouth	- Waste passes through here. The waste becomes harder
Small intestine	- There are lots of blood vessels. Nutrients pass into the blood here.
Esophagus	- Food goes down this tube to the stomach
Stomach	- Food is broken up by the teeth and mixed with saliva (by the tongue)
Large intestine	- The waste (Faeces) leaves the body
Anus	- Gastric juices make the food into a thick liquid

LIVEWORKSHEETS
