Class: Extractive Metallurgy

METALS USES AND PROPERTIES

Drag and drop the uses and properties of metals learnt in classes

	Name of Metal	Uses and Properties
1.	TUNGSTEN	
2.	MERCURY	
3.	STEEL	
4.	GOLD	
5.	METALS	
6.	NICKEL	
7.	ALLUMINIUM	
8.	SILVER	
9.	COPPER	

is bright and shiny

are good conductors of heat and electricity

is used to make coins

it is a light metal

It is a white precious metal

is used in thermometers, barometers and batteries

is used in wires and motors

is used to make lamp filaments

is durable, ductile, low weight and corrosion resistant
