Unit 8: Why is space interesting?

Vocabulary 2

I. Unscramble words:

lapnte

.....

krctoe

.....

ascpuetsi

.....

sscneitit

.....

otelecsep

.....

blraaroyto

.....

fatlo

.....

oitrb

.....

unclah

.....

sacpe sontati

....

II. Read and complete the sentences:

1. Hundreds of people came to watch the _____.
2. My father is an austronaut. He works in the _____ _____.
3. Venus is the hottest _____ in our solar system.
4. You can see bright orange light when a _____ burns fuel.
5. Scientists worked in _____ to invent a new model of telescope.

III. Read and choose correct words

Life on the Space

Life on the (space station/laboratory) is very different, at least until the (scientists/ astronauts) get used to it. The Space Station goes round the (Sun/Earth) in just 1 hour and a half. The most different thing is that there is no gravity. Astronauts (float/swim) wherever they want to go. If you leave something lying around on the Space Station, it will float away. So you have to be tidy before coming back to the Earth in the (rocket/telescope)!
