F. Read the article. Then complete each sentence with a word or phrase from the box. Not all words and phrases will be used.

Protect Yourself Online

Anyone can access the Internet, including people who want to steal your personal information or harm your computer. Here are some tips to protect yourself:

Be careful with passwords. Passwords protect your online accounts (like banking and e-mail) from being accessed by other people. Don't use passwords that are easy to guess, such as your birthday or phone number. Use a different password for every account. Change your passwords about every two months.

Use a firewall. A firewall is a software program that checks information coming from the Internet into your computer. If the firewall thinks a piece of information is bad for your computer, it won't let it into your system. You have to set your firewall and tell it what kinds of information are OK to let in.

Use antivirus software. Viruses can damage or destroy your computer. Get antivirus software to protect it. Antivirus programs check e-mail attachments for viruses and delete viruses from your hard drive. It's important to update this software regularly.

Check e-mail attachments. Attachments can carry viruses. Don't open attachments from anyone you don't know. Use an antivirus program to check all attachments before you open them. Even someone you know can send you an attachment with a virus by mistake.

Disconnect. If you follow these tips, you'll be well-protected. But to be even safer, always log off if you don't need to be online.

antivirus software	a firewall	log off	log on
password	an e-mail attachment		protect

Example:A firewall..... stops bad information from coming into your computer.

27. Use to remove viruses from your computer.
28. A virus can enter your computer through
29. You should change your about every two months.
30. If you're not using the Internet for a while, you should

G. Do you think that people's lives are better because of computers? Give reasons to explain your answer. Write at least one paragraph.
