In autumn there are many vegetables and fruits. Everybody likes to eat fruit. In winter it is _(6)_ _____ and it often rains. Sometimes there is snow on the groundǁ.

VI.Read the passage and answer the following questions by choosing A,B,C or D

The search for alternative sources of energy has led in various directions. Many communities are burning garbage and other biological waste products to produce electricity. Converting waste products to gases or oil is also an efficient way to dispose of waste. Experimental work is being done to derive synthetic fuels from coal, oil shale and coal tars. But to date, that process has proven expensive. Other experiments are underway to harness - power with giant windmills. Geothermal power, heat from the earth, is also being tested. Some experts expect utility companies to revive hydroelectric power derived from streams and rivers. Fifty years ago hydroelectric power provided one third of the electricity used in the United States, but today it supplies only four percent. The oceans are another potential source of energy. Scientists are studying ways to convert the energy of ocean currents, tides, and waves to electricity. Experiments are also underway to make use of the temperature differences in ocean water to produce energy.

1. Which is the best title of the passage?

A. Efficient Ways of Disposing of Waste
B. The Use of Water Productions for Energy
C. The Search for Alternative Sources of Energy
D. New Discoveries in Geothermal Power

2. In the second paragraph, the phrase "synthetic fuels" could best be replaced by which of the following?

A. Biological fuels B. Low burning fuels
C. Fast burning fuels D. Artificial made fuels

3. Which of the following is NOT mentioned in the passage as an alternative source of energy?

A. Burning of garbage B. Geothermal power
C. Synthetic fuels D. Electricity
