Art and Graffiti

What is the purpose of a painting, a sculpture, a statue, a photograph or a work of art, no matter how simple it is? Why should somebody take a piece of stone in his hand or use some colourful material to create something? It seems that human beings from the first moment on this earth felt the need to communicate with each other first because they needed to show their thoughts and feelings and later because they needed to look for beauty in their life. The history of man on Earth and the history of art go hand in hand. Works of art show how people thought and what they did during a specific period in history. Various kinds of art give ideas to future generations because art gives shape to people's view of the world.

Before asking whether graffiti is an art, we should remember that graffiti (messages, paintings) on walls of the caves of the prehistoric people is very important, because it gives us information about their need to show what they thought and also their need to produce works of art. Modern graffiti started as a youth culture in America, but by now young persons in Europe also create graffiti paintings. Graffiti has changed music, theatre, cartoons, posters, fashion and other forms of art. There are many kinds of graffiti. In our days, more and more young people are interested in it.
