

ACTIVIDADES UNIDAD 2

Material de lectura

RehabWorx is a physical rehabilitation team with a special interest in neurology. We consist of 3 independent practices, Retha Nienaber Inc (Physiotherapists), Nikki de Beer Occupational Therapists and Megan Barnes Speech Therapists. Our multidisciplinary team has skilled therapists, providing patients with quality treatment through their sound knowledge and experience in treating individuals with neurological conditions. Our comprehensive, rehabilitative service extends from admission into the Intensive Care unit or ward, to discharge from the ward and continuing with out-patient therapy within the warm confines of our vibrant gym.

Physiotherapy
Retha Nienaber Inc

At RehabWorx, the physiotherapists use International Standardised Outcome Measures to assess and re-asses an individual's progress. Treatments are goal directed to achieve short and long term goals, keeping patients motivated and encouraged. During therapy we aim to improve function in all aspects of the patient's life facilitating both independence and confidence. We are also FES clinicians hosting the Pretoria FES clinic.

Occupational Therapy
Nikki de Beer OT

At RehabWorx, our Occupational therapists, work closely with the multi-disciplinary team. Our focus is the evaluation and treatment of individuals with neurological impairments addressing limitations in participation in personal care, work and leisure routines. Our aim is to reintegrate them back into their communities.

Speech Therapy
Megan Barnes SLT

At RehabWorx, our Speech and Language therapists are involved in the assessment and treatment of speech and language disorders resulting as a consequence of neurological insult. Swallowing difficulties are a common sequelae following neurological involvement and can cause difficulty with eating or drinking.

[REPASAMOS SUFIJOS Y PREFIJOS Y EL USO DEL DICCIONARIO](#)

Las siguientes palabras fueron extraídas del texto:

Services – swallowing – conditions – Physical – Physiotherapists – Rehabilitation - Participation - Assessment – Continuing – Practices – Measures – Rehabilitation – facilitating – Therapists - Neurological – Motivated – reintegrate - Impairment – Patients – encouraged - Limitation – closely - Occupational – Directed - Evaluation – multidisciplinary – discharge – Treatment -

1. Prestar atención al comienzo o terminación de cada palabra y agruparlas según se indica en la tabla.

<i>-ing</i>	<i>re-</i>	<i>dis-</i>	<i>-ment</i>	<i>-s</i>
<i>-ly</i>	<i>-al</i>	<i>multi-</i>	<i>-ed</i>	<i>-ion</i>

2. Presta atención a la siguiente palabra.

- Utilizando los distintos sufijos que aparecen en la primera columna (y la ayuda de distintos diccionarios), deberás formar derivaciones de la palabra "absorb". Completa los casilleros de la primera columna en blanco con la categoría gramatical que se forma al agregar el nuevo sufijo.
- En la segunda columna, deberás escribir la palabra correspondiente en inglés (lo que se formó al agregar el sufijo a la palabra **absorb**; es decir: absorb + sufijo).
- Luego completa la tercera columna con el equivalente en español.

Absorb <i>Absorb</i>
