

Linear Inequality

Name: _____

Class: _____

1. Drag the linear inequality then drop it to the box below the right graph!

$2x + 3y < 6$

$4x + 2y \geq 8$

$3x + 7y < 8$

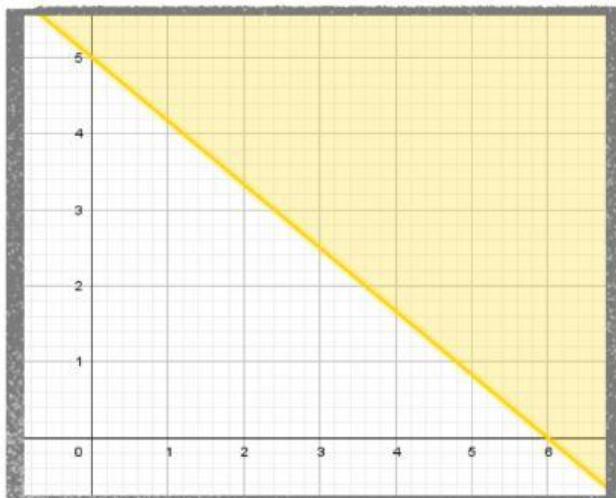

$x + 2y \leq 4$

$x - 2y < 4$

2. Join with arrows a true statement between the left side to the right side!

$5x + 4y < 20$

● $5x + 7y < 35$

The intersection point with X-axis is (7,0)

● It will be a dashed boundary

● The intersection point with Y-axis is (4,0)

● $5x + 6y \geq 30$

● It will be a solid boundary
