Blend and Strain the Lemonade

Any blender will work for this drink, just mix until the fruit is uniformly pureed.

You will end up with a pulpy mixture. You can toss the pulp if you choose, but you can also freeze it in an ice cube tray and to add to smoothies or frozen cocktails (like piña coladas) later.

Mix It Up

For blended, **non-alcoholic** fun (mocktail):

- For a bubbly versión, _____ a bit of sparkling water or lemon-lime soda.
- _____ it with frozen berries for a refreshing smoothie.
- _____ with some basil or fresh ginger.

If you want to **add alcohol** (cocktail):

- _____ into a flute and top with champagne.
- _____ with tequila and triple sec to create a strawberry margarita.
- Just _____ vodka or gin.
