Question 30: The (A) electric toaster (B) was one of the earliest appliance (C) to be developed for the kitchen

Read the following passage and mark the letter A, B, C, or correct word that best fits each of the numbered blanks.

Earth is the only place we know of in the universe that can support human life. ____ human activities are making the planet less fit to live on. As the western world carries on consuming two-thirds of the world's resources while half of the world's population do so just to stay alive we are rapidly destroying the ____ resource we have by which all people can survive and prosper. Everywhere fertile soil is either built on or washed into the sea. Renewable resources are exploited so much that they will never be able to recover completely. We discharge pollutants into the atmosphere without any thought of the consequences. As a ____ the planet's ability to support people is being reduced at the very time when rising human numbers and consumption are ____ increasingly heavy demands on it.

The Earth's natural resources are there for us to use. We need food, water, air, energy, medicines, warmth, shelter and minerals to ____ us fed, comfortable, healthy and active. If we are sensible in how we use the resources, they will last indefinitely. But if we use them wastefully and excessively, they will soon run out and everyone will suffer.

B. individual

C. lone

D. only

Question 33. A. development

B. result

C. reaction

D. product

Question 34. A. doing

B. having

C. taking

D. making

Question 35. A. hold

B. maintain

C. keep

D. stay

Read the passage and choose the best option A, B, C or D for each question

The search for alternative sources of energy has led in various directions. Many communities are burning garbage and other biological waste products to produce electricity- Converting waste products to gases or oil is also an efficient way to dispose of wastes. Experimental work is being done to derive synthetic fuels from coal, oil shale, and coal tars. But to date, that process has proven expensive. Other experiments are underway to harness power with giant windmills. Geothermal power is also being tested. Some experts expect utility companies to revive hydroelectric power derived from streams and rivers. Fifty years ago hydroelectric power provided one third of the electricity used in the United States, but today it supplies only 4 percent. The oceans are another potential source of energy. Scientists are studying ways to convert the energy of ocean currents, tides, and waves to electricity. Experiments are also underway to make use of temperature differences in ocean water to produce energy.

Question 26: What is the best title of the passage?

- A. The Use of Water Products for Energy
- B. The Search for Alternative Sources of Energy
- C. Efficient Ways of Disposing of Waste
- D. New Discoveries in Geothermal Power

Question 27: What provided one third of the electricity in the United States fifty years ago?

- A. wind
- B. waste products
- C. water
- D. oil

Question 28: What could replace the phrase 'geothermal power' in the passage?

- A. heat from the earth
- B. gases in the earth's atmosphere
- C. steam that shot up out of the earth
- D. water in the ocean, lake, or river

Question 29: Which of the following is not mentioned in the passage as an alternative source of energy?

- A. Burning of garbage
- B. Geothermal power
- C. Synthetic fuels
- D. Electricity

Question 30: According to the author, what is the impracticability of using coal, oil shale and coal tars' as sources of energy due to?

- A. They take a lot of time
- B. They are expensive
- C. They are non-renewable resources
- D. They are scarce resources

Give the correct form of the words given

Question 41: Our organization is going to organize an event about protecting the environment in our city and we need more _____ to help us now. **(participate)**
