What do colours say about your personality?

Did you know that the colours you like can tell other people what kind of person you are? It's because some of our preferences are connected with particular traits of character. For example, if you like black, you tend to be 1. _____ and it's difficult to make you change your mind. People who like red are usually 2. _____ and energetic. They want to be active both at school and later at work. If green is your favourite colour, you're probably quite 3. _____ and optimistic. And did you know that people who like brown, are usually 4. _____ ? They are also quite possessive (they don't like sharing things). Finally, people who like blue are 5. _____ and easily hurt, so be careful what you say to them!
