

1. Прочитай текст. Послухай аудіо запис. Заповни таблицю. (Read the text. Listen to the audio. Fill in the gaps.)

PLASTIC IS... FANTASTIC?

Today plastic is a part of our life. Lots of things around you are made of plastic: toys, pens, laptops, chairs, boxes. The parts of cars and houses are made of plastic, too.

We use so much plastic that now it's everywhere: in the land, in the water, in our bodies!

Lots and lots of plastic goes into the oceans. There are Islands of Rubbish in the oceans. The biggest one is in the Pacific Ocean and it is two times bigger than the size of our country! Many sea animals eat that plastic and die.

In the land or water, plastic rubbish breaks into small parts.

There are lots of very small pieces we cannot see. They are called 1 microplastic. All the animals and people eat this and drink this because we can't see it. We can't collect it because it's too small.

One more problem is that plastic stays for very long time in our land and water.

Заповни таблицю числами: скільки років розкладається пластик?

				
plastic bag	coffee cup	plastic cup	plastic bottle	plastic toothbrush
___years	___years	___years	___years	___years

2. Заповни таблицю. Користуйся інформацією в завданні №1. Послухай аудіозапис. Заверши заповнення таблиці. (Fill in the table. Use the information from exercise 1. Listen to the audio. Finish the table.)

PLASTIC: GOOD or BAD?

+	-

- Plastic stays for very long time in our land and water.
- It's hard and it's light.
- People can create it fast.
- It doesn't need lots of energy to create it.
- Plastic bags protect our food from dust and insects.
- Many sea animals eat that plastic and die.
- Animals and people eat and drink microplastic.
- We can use plastic things for many years.

3. Прослухай аудіозапис. З'єднай лініями зображення проблем із зображеннями їх вирішення. (Listen to the audio. Match the pictures.)
