

Network	LAN, WAN or the Internet?
 The diagram shows a Local Area Network (LAN). A central blue horizontal bar is labeled "Ethernet". Five computers are connected to this bar: an "IBM Compatible" desktop monitor, an "iMac", a "Server" tower, a "Laptop computer", and another "IBM Compatible" desktop monitor.	
This type of network lets your teacher save their Computer Science files to OneDrive.	
 The diagram shows a Wide Area Network (WAN). It features a globe in the center with green lines representing network connections across its surface. Two computer monitors are shown, one above and one below the globe, each connected to the network lines.	
Cash machines throughout the UAE for a bank are connected to this network.	
You can play an online game against someone in Mexico using this type of network.
