

# Pollination

Write numbers to order the stages of pollination.

**a) A new plant grows.**

**b) From the stigma, the pollen travels down the ovary.**

**c) Here, the pollen fertilises the ovules.**

**d) Insects and small birds pick up pollen.**

**e) Some of the pollen sticks to the stigma.**

**f) The fertilised ovules develop into seeds.**

**g) They transport it from the stamen to the pistil.**

**h) When the flower dies, the seeds are spread.**
