

A. Use the hundred chart to add. Remember tens move down and ones move right.

1 $15 + 14 + 33 =$

2 $24 + 31 + 18 =$

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80

B. Use the hundred chart to subtract. Remember tens move up and ones move left.

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

1 $82 - 45 =$

3 $62 - 40 + 26 =$

2 $50 - 31 =$

4 $38 + 14 - 36 =$

C. Match the abacus with the standard form and the standard form with the word form.

423

six hundred thirty-five

635

four hundred twenty-three

670

six hundred seventy

D. Type the number in standard form.

1 $500 + 40 + 8 = \square$

2 $100 + 30 + 5 = \square$

C. Type the number in expanded form.

1 $456 = \square + \square + \square$

2 $923 = \square + \square + \square$

E. Skip count to complete the pattern.

1 232, 234, $\square$, $\square$

2 310, 315, $\square$, $\square$

3 400, $\square$, $\square$, 700

4 650, 660, $\square$, $\square$

F. Select the correct symbol.

1 550 540 > < =

2 $600 + 50 + 7$ 756 > < =

3 266 265 > < =

E. Solve the following problem.

Steven has 260 toy dinosaurs. Brian has 160 toy dinosaurs. Brian wants to have the same number of toy dinosaurs as Steven. How many more toy dinosaurs does Brian need?
