

MEASURE OF CENTRAL TENDENCY

Name: _____ Score: _____

Direction: Read each item carefully. Choose the letter of the correct answer.

1. What do you call the difference between the highest and the lowest score in a given data?

- A. mean B. mode C. median D. range

2. Which of the following is the other term for average?

- A. mean B. median C. mode D. range

3. What letter represents the number of cases or scores?

- A. i B. m C. n D. o

4. Which of the following is the average of the lower class limit and upper class limit?

- A. class size B. class marks C. class interval D. class boundaries

5. The highest score is 45 and the lowest score is 20. What is the range of the given data?

- A. 20 B. 25 C. 30 D. 35

6. What letter represents the class size or interval?

- A. a B. e C. i D. o

7. Which of the following refers to the number of observations in each class interval and is usually represented by a tally?

- A. class mark B. class size C. class interval D. class frequency

8. Which of the terms below refers to a small part of a grouped data?

- A. community B. family C. population D. sample

9. Which of the following represents the entire group of data?

- A. community B. family C. population D. sample

10. Which of the following measures of central tendency is commonly used?

- A. mean B. median C. mode D. variance
