

Student Worksheet

"DATA REPRESENTATIONS"

ACTIVITY 2

Allocation Time : 5 minutes

Learning Activity Goals : Students can give examples of data in daily life

Instruction :

1. Read any information that has been given.
2. Answer the questions given

Take a look at the following example:

The class information board in front of the class is an example of a media that conveys data. In the information board there are the total number of students in the class, the number of male students, the number of female students, the number of students who attend, the number of students who are not present.

Stock data in a store is also data that shows the number of items in each type. For example, there are 15 stocks of cooking oil, 4 sacks of wheat flour, and so on.

Have you ever encountered data in your daily life? Write down the data you've met and where you found it!

Answer:

Pay attention to this classroom environment! Can you create data from existing conditions? Write down the data you can make!

Answer:
