12	18
24	30
48	54
60	66

Which statement is true?

F The pattern is multiplicative, because the y-values are 1.5 times the corresponding x-values.

G The pattern is multiplicative, because the y-values are 6 more than the corresponding x-values.

H The pattern is additive, because the y-values are 1.5 times the corresponding x-values.

J The pattern is additive, because the y-values are 6 more than the corresponding x-values.

The relationship between the x-values and y-values creates a pattern that is --

A additive, because each x-value increases by 5

B additive, because each y-value is determined by adding 17 to the corresponding x-value

C multiplicative, because each y-value is determined by multiplying the corresponding x-value by 17

D multiplicative, because each x-value is a multiple of 5

- C The x-coordinate is the second number in an ordered pair.
- D The origin is the intersection of the x-axis and the y-axis.
