

WORKSHEET

Reading Activity

Direction: Read the piece of the text carefully and then, answer the questions below

Boats and Cars

Boats and cars are forms of transportation. They can get you from one place to another. They both need someone to control the direction that they go. Boats travel on water, while cars travel on roads. Cars have wheels that help them to move on land. Boats do not need wheels since they only travel on water.

Answer "True" or "False" according to the paragraph above:

- 1) The paragraph is about Trains and Ferries. _____
