

Áreas de figuras planas

Ligue a figura a sua fórmula para cálculo da área:

$$A = \frac{D \times d}{2}$$

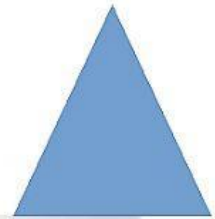

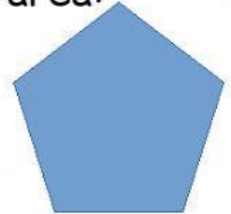

$$A = \pi \times r^2$$

$$A = l \times l = l^2$$

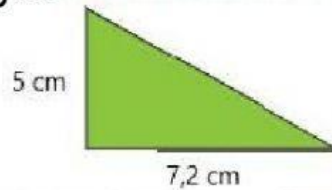

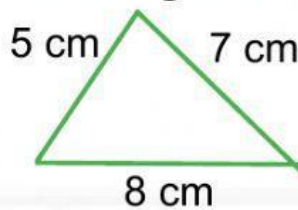

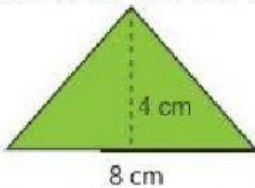

$$A = \frac{b \times h}{2}$$

$$A = \frac{P \times ap}{2}$$

$$A = b \times h$$

Calcule a área de cada triângulo a seguir:

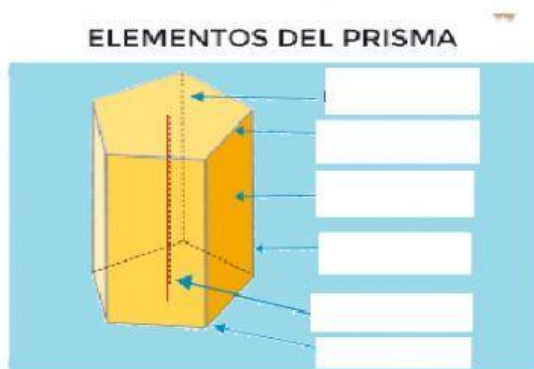

cm

cm²

1) Seleccione os elementos do prisma:

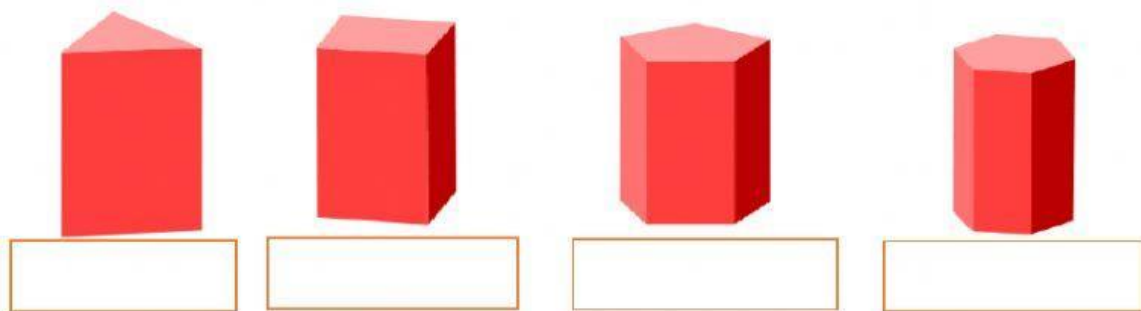

2) Arraste o nome dos prismas ao sólido geométrico que o representa:

Prisma base triangular

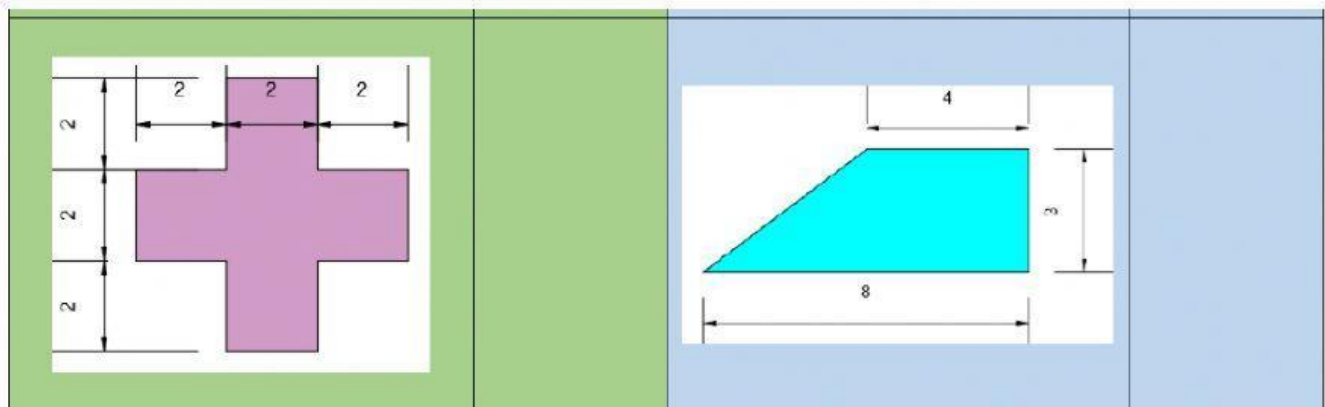

Paralelepípedo

Prisma de base pentagonal

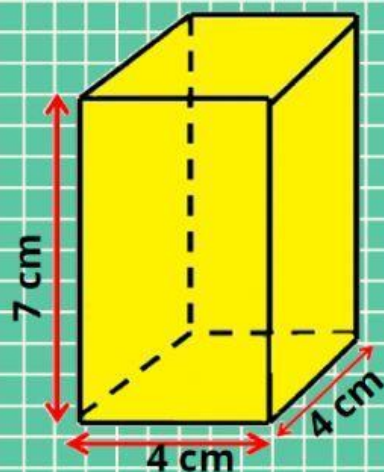

Prisma de base hexagonal

Selecione a medida da área de cada figura a seguir:

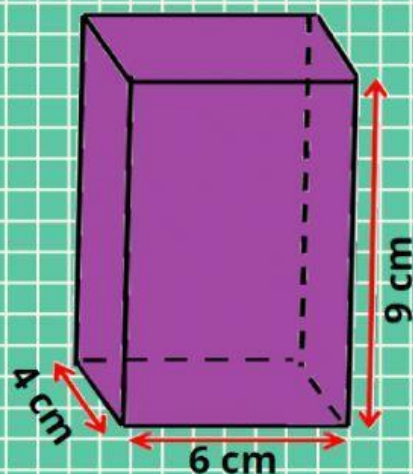

Calcula el área del prisma:

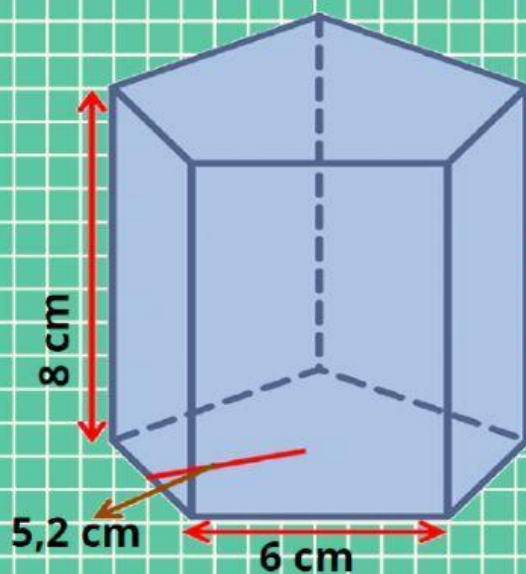

Área del prisma: cm²
