# Circuits

Fill in the missing words

complete

energy

path

positive

loop

negative

electricity

A circuit is a \_\_\_\_\_ that allows \_\_\_\_\_ to pass through it.

Electricity always travels from the \_\_\_\_\_  
to the \_\_\_\_\_.

A circuit will only work if it is \_\_\_\_\_. This means it must make a complete \_\_\_\_\_, otherwise the electrical \_\_\_\_\_ cannot flow.

Draw arrows on the diagram to show which way round the electricity is flowing.
