Ms. Anyela Letrop FIFTH GRADE
QUIZ III Bimester 2022 - SCIENCE

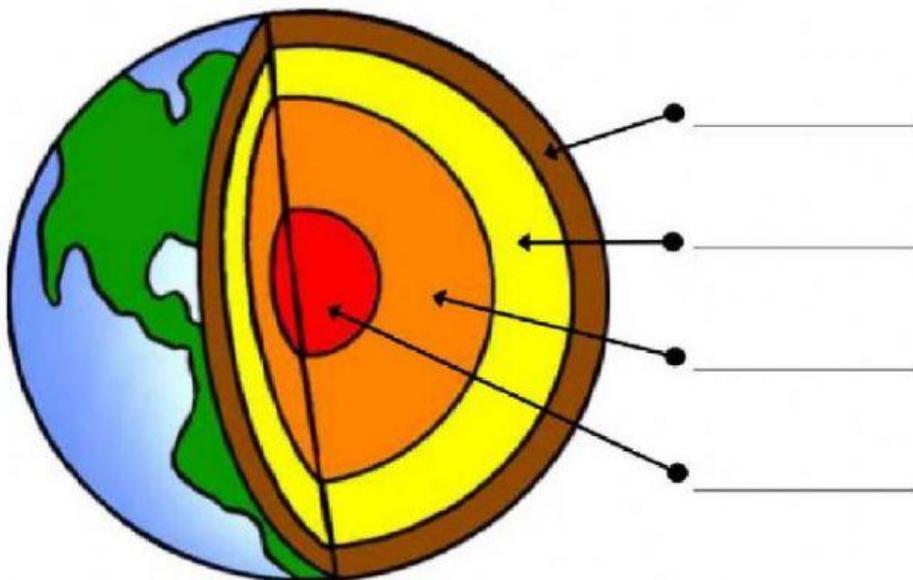

1. Write the name of the layer with its description.

_____ In this layer, temperature increases because ozone here absorbs high energy UVB from the Sun.

_____ It is the lowest portion of Earth's atmosphere. Most of the weather phenomena occur in the troposphere.

_____ It is the coldest layer, and in satellite pictures it is seen as a blue layer.

2. Write the name of each one of the layers of the Earth.

3. Write a letter T if statements are true and F if is false.

Latitude is the geographic factor that refers to the location of ozone in relation to the sea level.

Cloudiness is the amount of rain that falls throughout the year.

When we say "today is a hot day" we are talking about the weather.

The presence of vegetation is a factor that influences the climate in a zone.

One of the most important atmospheric elements for the living beings is the presence of water.
