 - Line 6: []

The interface includes a 'SEND' button and icons for text formatting, attachments, links, emojis, images, and deleting the draft.

1. The e-mail address is not professional, and it gives a bad impression.
2. The sender does not write his full name and position in the company.
3. There is no Salutation.
4. There is no Closing.
5. The Subject is not concise and to the point.
6. Exaggerated use of Capital letters and Exclamation marks. It is like shouting the message.
7. Use of Imperative sentences. They are not polite requests; they express direct commands.
8. The verbs "Need" and "Want" are very direct and imply urgency. They may sound rude and selfish.

Drag and drop the sentences to make the e-mail more professional:
