|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. | <p>Write the following words in numerals</p> <p>a) Twenty four thousand, five hundred and eighty one.</p> <p>Ans _____.</p> <p>b) Four hundred and two thousand and ninety six</p> <p>Ans. _____</p>                                                                                                                                                                                     |
| 2. | <p>Write the following numerals in words</p> <p>a) 20 405</p> <p>Ans. _____</p> <p>_____</p> <p>b) 320 190</p> <p>Ans. _____</p> <p>_____</p>                                                                                                                                                                                                                                            |
| 3  | <p>Write the numeral for each of the following:</p> <p>a) <math>(3 \times 10\,000)</math> <math>(2 \times 100)</math> <math>(6 \times 10)</math> <math>(9 \times 1)</math></p> <p>Ans: _____</p> <p>b) <math>(4 \times 100)</math> <math>(7 \times 10)</math> <math>(8 \times 1)</math> <math>(4 \times \frac{1}{10})</math> <math>(6 \times \frac{1}{100})</math></p> <p>Ans: _____</p> |

|   |                                                                                                                                                    |
|---|----------------------------------------------------------------------------------------------------------------------------------------------------|
| 4 | <p>State the value of the 4 in the following numerals:</p> <p>a) 14 923 _____</p> <p>b) 1 942 _____</p> <p>c) 12.46 _____</p> <p>d) 8.64 _____</p> |
| 5 | <p>Round 632 to the nearest tens</p> <p>Ans: _____</p>                                                                                             |
| 6 | <p>Round 4 963 to the nearest hundreds</p> <p>Ans: _____</p>                                                                                       |
| 7 | <p>What is the largest 5-digit number which can be made using the following digits?</p> <p>4   7   3   8   2</p> <p>Ans: _____</p>                 |
| 8 | <p>Add together: 8 325, 3 200 and 941</p> <p>Ans: _____</p>                                                                                        |
| 9 | <p>From 12 000 minus 483</p> <p>Ans: _____</p>                                                                                                     |

|    |                                                                                                                                                                                                                        |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 10 | <p>Calculate the product of 475 and 25</p> <p>Ans: _____</p>                                                                                                                                                           |
| 11 | <p>Divide 847 by 7</p> <p>Ans: _____</p>                                                                                                                                                                               |
| 12 | <p>Calculate the missing numeral</p> <p>a) <math>68 + \underline{\hspace{2cm}} = 198</math></p> <p>b) <math>295 - \underline{\hspace{2cm}} = 49</math></p> <p>c) <math>\underline{\hspace{2cm}} + 146 = 500</math></p> |
| 13 | <p>Calculate the total of:</p> <p>\$ 143.25 + \$ 14 + \$ 6.07</p> <p>Ans: _____</p>                                                                                                                                    |
