How to Operate Digital Camera

You need:

- A digital camera
- An object

Follow the steps below to take pictures:

1. Hold up the camera and center the object in the LCD.
2. Move closer or use the zoom control for the result you want.
3. When you are ready to take the picture, hold the shutter halfway.
It is important, so the camera sets the focus, shutter speed, and various other calculations.
This may take few seconds.
4. A light should appear that lets you know the camera is set to go. Press shutter all the way down.
