

What is the purpose of ...?

It doesn't have 4 wheels like a car. It has 2 wheels like a bicycle, and it has a motor like a car.

It is designed to move people and cargo from one place to another in the air. Most people use it to travel faster and more comfortably.

People use them to get to where they want to go. This means there are no stops in between where they get on and where they get off.

It is designed to run in metropolitan cities and is responsible for carrying large numbers of people. Mostly energy is used and they are modern
