Advance _Addition and Subtraction numbers 100

Grade 2

1 Draw a line to match each problem with its equation. Then find the answers.

a The pet shop owner had 14 hamsters. She sold 5 of them on Monday and 3 of them on Tuesday. How many hamsters does she have left?

b There were 12 puppies in the pen. The pet shop owner sold some of them. Now there are 7 puppies in the pen. How many puppies did she sell?

c The pet shop owner got 9 rabbits yesterday. A family came in and bought 2 of them. Then the shop owner got 8 more rabbits. How many rabbits does she have now?

d There were 16 fish in the big tank. The shop owner moved some of them. Now there are only 9 fish in the big tank. How many did the shop owner move?

e The shop owner had 6 kittens. Then she got some more kittens. Now she has 13 kittens. How many kittens did she get?

$9 - 2 + 8 =$ _____

$14 - 5 - 3 =$ _____

$6 +$ _____ $= 13$

$12 -$ _____ $= 7$
$16 -$ _____ $= 9$

Fact Family Triangles

Match each Unifix train to its fact family triangle. Then write 2 addition and 2 subtraction sentences to match. Write them under the train.

example

$4 + 9 = 13 \qquad 9 + 4 = 13$

$13 - 4 = 9 \qquad 13 - 9 = 4$
