Student A

You and Student B are classmates. It's the start of the summer holidays. However, your teacher wants some students to help prepare for next Sunday evening's summer school fair. One of you has to go and help, so who's it going to be?

You and your partner both have four free periods next week. To help decide, you're going to play a game where you must find your partner's free periods. You must find all four free periods to win.

Take it in turns to ask your partner about their arrangements for next week, e.g. 'What are you doing on Wednesday afternoon?' Reply to your partner's questions using the present continuous for future arrangements, e.g. 'I'm working at the cafe'.

The first person to find all their partner's free periods can enjoy their free time next week. The loser has to spend their free time helping the teacher prepare for the school fair!

Below is a copy of your diary for next week. Do not show it to Student B!

	Mon	Tues	Wed	Thurs	Fri	Sat	Sun
Morning	meet James for coffee	do school project	**free time**	go to the beach	do the gardening	**free time**	play tennis
Afternoon	go shopping	go to the zoo	work at the cafe		**free time**	study English	do judo
Evening	**free time**	watch football	go to the gym	travel home	go to Tom's party	visit Sam	go to the school fair

Write Student B's answers in the diary below.
