

Natural Science: ENERGY

1. Look and circle the correct word. Then, complete the energy transformation diagrams.

Energy is **transformed / stored** in the catapult. This energy is **transferred / transported** to the angry bird when the catapult is released.

Energy is **transformed / stored** in the wood. This energy is **transformed / transported** when the wood burns.

2. Write the type of energy in each case.

energy

energy

energy

energy

energy

energy

3. Match the photos to the type of energy transformation.

- A. chemical energy → thermal energy
- B. chemical energy → kinetic energy
- C. chemical energy → electrical energy

4. Write the FORM OF ENERGY that you observe in each picture: kinetic or potential.
